Description : Managing Parks, Fields and Recreation Facilities Reservations is a monumental task. Tasks like publishing a slot/schedule, managing reservation requests / approvals, communicating about slot changes, waiting in queues to make a reservation request are pretty time taking and stressful. We can help solve this problem with simple button clicks through our application.

Key Features:

- Slots scheduling - scheduling slots using calendar events
- Dashboards - Admin and User dashboards
- Payment integration - Paypal payment authorise and capture
- AWS Services - AWS services integration
- Auto renewal - Auto renewal monthly subscriptions

Responsibilities:

- Doing requirement analysis.
- Created the UI Screens and Integrated the API's for Slots, Schedules, grounds, parks etc.
- Involved in various module development such as user, admin, system admins.
- Worked closely with clients to establish problem specifications and system designs.
